What is a cajón?

It is a six sided, box-shaped percussion instrument originally from Peru, played by slapping the front or rear faces with the hands, fingers, or sometimes various implements such as brushes, etc. The modern cajón may have facilities at the top for adjusting percussive timbre. Some versions may also have several stretched cords pressed against the top. The player sits astride the box, tilting it at an angle while striking the head between his knees. The percussionist can play the sides with the top of his palms and fingers for additional sounds. The modern cajón is often used to accompany the acoustic guitar.

The cajón has come to my attention because it has been used in our Beacon Service. Would you like to play one? Please let us know. Why not check it out on You Tube?
